

Liter's Inc.
5918 Haunz Lane
Louisville, KY 40241

July 29th, 2011

Dear Neighborhood Associations and interested parties,

This letter is to serve as a reminder that Liter's Inc. will increase production at their Rock Springs mine located at 6300 Moser Farm Road in the very near future. As we are all aware, the economy suffered a significant slump in recent years resulting in our curtailed production company wide and at this location. As the economy begins to rebound, we have seen an increase in demand in the nearby market and we are currently moving in crushing and mining equipment to meet this demand in anticipation of the increased operation. Our target deadline is August 1st, 2011. We are excited about the opportunity to bring a quality product that is competitively priced into the local market. Liter's has always set high standards for itself when it comes to safety, quality and community relations. This has and will not change.

We will continue operating under the terms of Conditional Use Permit (CUP) issued in 1991 which permit allows drilling, blasting, and crushing limestone rock for resale. We also are required to comply with state and federal regulations as we operate this underground quarrying operation.

As we move through this process we will keep the neighborhood associations informed and aware of any changes that are taking place at the mine. We will give any necessary information to the Association Presidents monthly for release in their newsletters. If you have any questions or concerns feel free to contact me at work 502 241-7637.

Sincerely,

Barry L. Hornback
Vice President of Operations
Liter's Inc.
