Annual General Meeting– Save the Date!

The Annual Meeting of the Homeowner's Association is to take place at:

7.00pm, Thursday 25 September at St. Aloysius School Cafeteria in PeeWee Valley

Everyone is invited and encouraged to attend. The primary purpose of the meeting is to elect directors for the coming year. This year we have three Board positions that are open. We currently have one nomination and we welcome further nominations from all residents willing and able to devote a few hours each month to help with the running of our neighborhood.

Speeding

Speeding continues to be the most important issue facing our neighborhood. We need to continue the search to find a solution to the problem. Lieutenant Tim Wakefield from Oldham County Police has kindly agreed to attend the Annual Meeting to discuss speeding and the options that are available to try and crack down on the problem. Speeding affects everyone and we want to make the subdivision as safe as we can. If you have any thoughts on speeding but cannot make the Meeting, please email the Board at www.briarhillestatesky.com

Recycling gets the Green Light

Local residents Ron Zolkiewicz and Megan Ploch have been working hard on ID over the last few months and

gathering up the required number of signatures to start a recycling service for Briar Hill Estates and adjoining subdivisions. Their hard work has paid off and ID will soon start the new service. The cost will be \$5.75 for each household that would like the service. Collection will be once every two weeks. For more information about the service and to sign up, please call ID at 638 9000. We expect it will become a very popular service and thank Ron and Megan for all their hard work.

Garbage Trucks

Also on the subject of ID, we continue to have the occasional problem with their garbage trucks leaking hydraulic oil on the subdivision streets. ID promises us they are working hard to stop this once and for all. However, if you notice oil spills after a trash pick up day, please call ID at 638-9000 and report it. The more complaints they get the more likely, it will be resolved.
